# AssessHub

**Employment Suitability. Assured.**

AssessHub' involves the use of customized online assessments comprising all areas of aptitude, Logical Reasoning, Verbal Ability, Psychometric & Technical testing to evaluate potentials of prospective employees and integrate them into your organization in their best-suited profile.

Developed by industry stalwarts and HR professionals, 'AssessHub' is set to please recruiters with solutions embracing the entire aspect of employment suitability fine-tuned to your organization.

The assessment test works across different hierarchy, regions and processes due to its custom made design and process. It makes managing assessments easier through its profile of real time tracking and centralized accounts to search and filter candidates. AssessHub enables a detailed report of pre hiring practices and completely primes recruiters with a standardized suite of outcomes for candidates to put them through to the next round of interviews. Through a simplified interface and a commitment to delivering the right shortlist of talent, Assesshub is a budding industry favorite with a number of endorsements across organizations everywhere.

Tailoring the best hiring solutions is no easy task but AssessHub made the effort worth it for us. Industry veterans endeavoring to marry scalability and innovative technology into the product have developed the capabilities of the assessment mechanism with a superior structure to help mitigate time and costs well. Whether the domain of testing is in aptitude or reasoning or psychometrics Assesshub unites multiple question formats and complex algorithms to generate assessments that visibly balance the suitability of candidates to work profile. It uses sophisticated design to source quality hires faster.

**After having completed 50000 assessments, 'AssessHub' has proved that it is not just a superior hiring solution, but also as a thinking engine that develops your human resource and our credential as a leader in developing superior online assessment tests.**
